# OUT WITH THE OLD IN WITH THE NEW

"Mountain has done a great job with traffic and other businesses by keeping the road clear. We've worked with you guys for years, you've done a great job bringing in equipment that all works well. Our customer is very happy. It's been great working with Mountain." -Scot Nielsen, Superintendent Brahma Group

Unbeknownst to many, a sonar testing facility is located just outside Salt Lake City. The facility is used for both Naval torpedoes and other commercial testing. When it came time to upgrade the facility, Brahma Group was tasked with adding 10 feet of depth to the pond and replacing

the bridge. The Mountain team brought our LR1600 crawler to remove the old bridge and set the new, heavier bridge in place. Our engineering team set the stage and the whole process was completed to perfection. We are grateful for a great partnership with Brahma Group.

# Expanding the Bridge and the Pond

Our Partner:

BRAHMA GROUP

**101k** Old Bridge

**186k** New Bridge

**10'** Depth added to testing pond

## UTILIZING THE DERRICK

The Liebherr LR1600/2 is a versatile heavy-lift machine and one of the many work horses in the Mountain Crane fleet. In addition to its wind configurations for 100m wind turbines, this machine is also equipped with a variable derrick system with hydraulic controls. The additional ballast increases the crane's load moment, allowing the crane to perform heavy lifts at longer reaches. This particular lift used 331,000 lbs. of ballast and allowed our crews to complete a 186,000 lb. lift. Our engineering team works very closely with our customers to ensure that all critical lifts are in compliance with both owner and customer requirements, including ground bearing pressures and percent of chart capacity.

# LTM 1130

## With a Side of Lime

Working in Nevada, our brand new LTM 1130 was on site at a lime plant changing the drive system on a bucket elevator at 135 feet. It took about three hours to wash the lime dust off the crane after this job but it was a great project!

Great work to all involved!

BY JIM WEST, OPERATOR

## Safety Strong

Safety Share April 2021

The work place changes everyday with new hazards and dangers whether we see them or not. Taking that single moment to acknowledge those hazards/dangers is how we are able to continue taking care of what's important in our lives away from work and our Mountain family.

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
