Business Complex

West Valley, UT

The work continues at this project in West Valley. If you've driven on the West side of I-215 in the Salt Lake Valley recently, you've likely seen our two lattice booms in the skyline for several months. Our Manitowoc 777 crawler, and our Liebherr LR 1160 have been in the area since the beginning of May. We've been involved in all aspects of the building process for various projects and clients, including the building of the new West Valley City Police Headquarters. It's always rewarding to be involved in projects over an extended period of time to watch the progress happen. Congrats to our team for a job well done in sunshine, rain and now snow!

••••

THERE'S "SNOW" BUSINESS LIKE THE CRANE BUSINESS!

Fresh snowfall made for a scenic job-site in Salt Lake City recently. Using our Grove 115 ton, All Terrain crane, we placed an angle iron and 7 concrete beams approximately 16,000 lbs at this new construction, residential project.

“ MHT MINUTE

How do you move extremely heavy loads into tight spaces? With MHT and our Goldhofer modular transporter. We have the capacity to move loads up to 2 million pounds. The trailers are extremely maneuverable and we have the know how to make even the toughest job a success! Put it on a Goldhofer, it'll move anything!

Mountain Crane Services provides a variety of crane services throughout the Western United States including; plant shutdowns, steel erection, pre-cast concrete, tilt-ups, HVAC, transformers, bridge girders, general commercial construction, and wind turbine construction and maintenance, to name a few. Mountain Heavy Transport provides all heavy transport services, including heavy haul, jack-n-slide, and modular platform trailers (Goldhofer). Mountain Crane Service employees receive continual training through Operating Engineers Local 3 and have their NCCO Certification.
