LIEBHERR MODEL CRANE

SAFETY STRONG!

The Mountain team gathers for another quarterly safety meeting

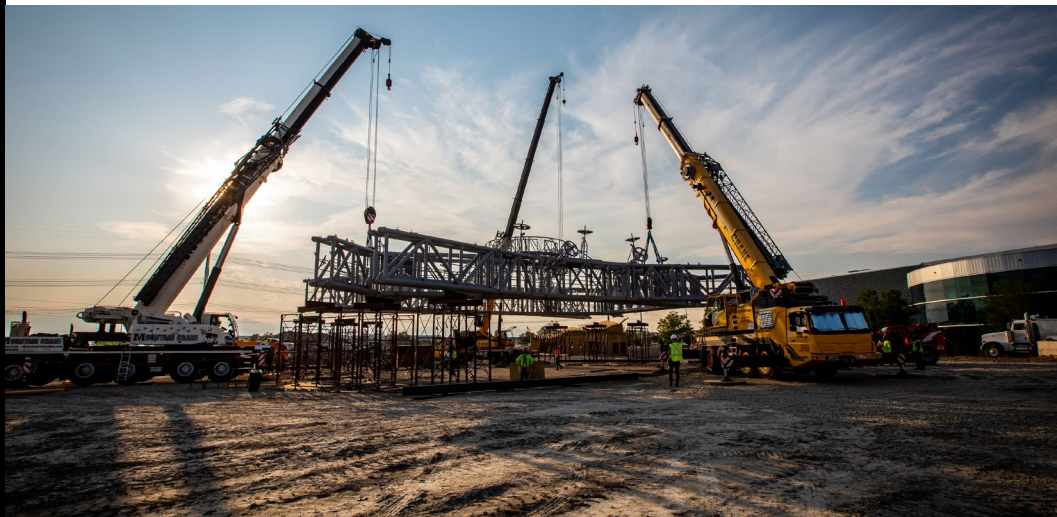

The Utah Highway Patrol shared valuable information about driving safely and eliminating distractions. Employees got to experience their impact simulator.

SETTING THE STAGE

IN DRAPER, UTAH

From 2009 - 2011 U2 was touring the world with its infamous "Claw", their massive and equally impressive stage. Now, after all this time the stage has an encore performance at the Loveland Living Planet Aquarium in Draper, Utah. It will be known as EECO or Ecosystem Exploration Craft & Observatory Command Center. Essentially it is a high tech learning campus focused on the environment. Our team was brought on scene to bring it off the ground and make it a reality for the Aquarium. As the project progressed we had anywhere from one, to three, and finally 8 cranes on-site as we hoisted the massive, 238 ton, steel structure into place. Totally assembled, it stands approximately 165 feet tall. We are extremely proud of our entire team for the effort and success of this job! Our partnership with the Aquarium and SME steel made for an excellent project.

A NEW CROSSING IN THE CANYON

Drivers will now have a way to safely pass through this beautiful, low water crossing area in American Fork Canyon. While the water was diverted, the Mountain team used our Grove 115 ton AT crane to place 80 feet of articulating mats for the U.S. Forest Service.

LOOKING BACK...

April, 2016. Our crane and heavy haul crews teamed up to make this job a success. We transported and set this massive spray dryer

er using our Osh-Kosh M1070 tugger and 550 ton Grove, all terrain crane. Loaded up, the dryer was 26 ft tall and 20 feet wide.

MOUNTAIN

STRONG

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.

OCTOBER CONTEST:

- Model Crane
- Liebherr LTM 1050 - 3.1
