DINNER FOR TWO!

Two Crane Pick

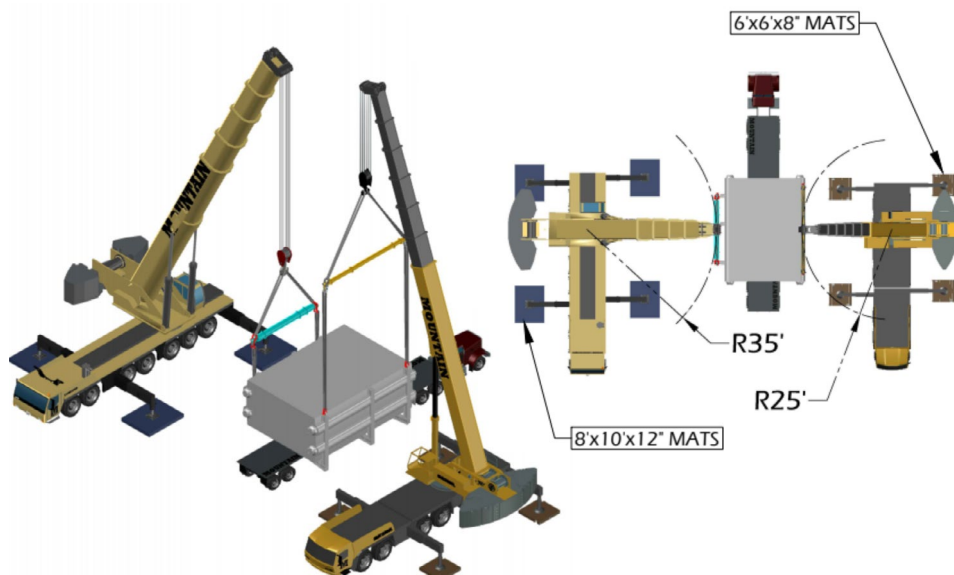

Wyoming

The Mountain team recently offloaded and tripped a 230,000 pound evaporator. The lift involved our skilled team operating our Grove 6300L (350 ton) and Liebherr LTM 1400-7 (500 ton) cranes. In order to execute these picks successfully it requires great communication between our operators and signalmen.

The engineering department at Mountain also provided a great deal of help to ensure we had appropriate ground bearing pressures, the proper rigging, and proper crane sizing to make for a successful job.

Salt Lake International Airport Redevelopment Project

Topping Off Ceremony
North concourse.

“ MOUNTAIN HEAVY TRANSPORT

The Mountain team recently transported a large dipper bucket for repair work. Loads like these get a lot of looks as they travel down the freeway. This giant piece was over 14 feet wide on the trailer and over 110k pounds. The dipper holds over 56 yards of material in each scoop! Our heavy haul team planned and executed this move perfectly. Great job!

MOUNTAIN STRONG

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
