# AIN'T' NO MOUNTAIN OR RADIO TOWER HIGH ENOUGH!

Atop the beautiful mountains of Cedar City, Utah, and at 10,800 feet, our team reached new heights as we took our Grove 350 ton crane to it's maximum boom length in order to set a 3,500 lb. radio tower.

Getting safely to the job site was our first challenge and priority. With steep grades and hairpin turns, trucks could not be used. All equipment was brought in with 6 lines of our self propelled Goldhofer modular transporter. Once on-site, our 350 ton crane utilized 2 inserts, jib, and main boom totally nearly 400 feet! The job was safely executed in a day. Well done team!

[Check out the video here!](#)

## IT'S A BEAUTIFUL DAY IN THE NEIGHBORHOOD

It's always a sight to see a massive crane drive through the streets of a residential subdivision. That was just the case on this job. Our Grove, 115 ton AT was called in to hoist a spa from an adjacent field, over the tennis court, above the house and to its final place in the backyard!

## THE WINDS OF CHANGE

Changing out rotors, gear boxes and blades. We love all types of wind work! We have the know-how, the operators and equipment to handle any type of wind job, from new construction to maintenance and anything in between.

# MOUNTAIN STRONG

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
