## Setting the Statue

Our team had the pleasure of setting the "Angel Moroni" statue atop the Layton, Utah LDS Temple this month. These lifts are unique as one crane lifts the statue and the other hoists a man basket for the installers.

## Specialized Lifts and Moves

Projects often involve more than just a crane lift. The Mountain team has the capability to execute transport, lifting, moving and installation tasks, even in the tightest spaces.

Our team recently completed this featured project at Little America Hotel. We removed the old hot water exchange tank from inside the hotel and replaced it with a new tank. Both tanks had to be carefully moved approximately 20 feet inside the basement in order to complete the job.

# New & Improved

Old Tank: 9,000 lbs, New Tank: 6,000 lbs

## ON THE HOOK, ON WHEELS OR ON SKATES

Not every object can be moved with a truck or a crane. When space is limited or when working inside a building, skates or specialty rigging must be utilized.

Our special projects team has all the equipment and know-how to move any object in any circumstance.

## Safety First... Testing the Spreader Bar

Test picks are a critical part of the commissioning process with new rigging. These picks provide assurance that the equipment can be used safely and effectively on future projects. Our LTM 1400 all terrain recently performed a test pick on multiple tilt spreader bars. Our team performs these test lifts on our own rigging and for our customers as well. Contact a member of our team to learn more.

## Safety Strong, Safety Share: Follow Your Gut...

"Just remember what I always say, if it doesn't feel right, chances are there's probably something that isn't right. So always lean on the side of caution and do whatever it takes to make sure everyone makes it home safe every night"

Bryce Olsen, Mountain Field Safety Manager

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
