A Whale in The City??

With an audience in attendance, we recently had the great opportunity to be involved with this unique project. Our team and 115 ton crane installed a massive whale sculpture within a traffic round-about in Downtown Salt Lake City.

Seeing the Project Through

Our team was on site in the pre-planning phases of this great project starting back in May 2020 when our Liebherr LTM 1750 was erected to build up the tower crane which supported the majority of the project. We were proud to assist with the concrete, electrical contractors, dirt removal, steel suppliers, masonry work and

other trades through the many stages of construction. We utilized over 13 different types, sizes and configurations of cranes, ranging from our boom trucks to our largest cranes. In the final phases of construction, our skilled tower crew finished by dismantling the tower cranes and providing additional support as needed. Once complete, the site will include residential units, hotels & shopping. Thanks to all the contractors that included us as part of the project team.

Lifting Professionals

Making Each Lift With Precision and Safety

LET US STORE IT FOR YOU

Got project supplies and limited space?
We've got you covered.

Not only can we store your equipment & supplies, but we can transport and off-load regardless of the size or specification. With over 4 acres of storage capability we offer both secure outdoor and indoor space. Call Josh: 801-608-6969 for more information.

Our Massive LR 11000

All the Right Equipment and Experience

Our wind capability is diverse. From new construction, repower, thermal events, maintenance and blade transport, each project brings new challenges and opportunities. With jobs continually running throughout the US and Central America, our team is ready to assist with your next wind project.

Safety Strong, Safety Share

Planning before, during and after job is key to a Safety Strong mind-set. Operators, oilers and sales team doing the leg work before anything is started, then following through with the plan is the way to have a safe and productive job. Knowing your equipment and the team's capabilities before-hand will cover mid-job hiccups and keep everyone going home the way they came!

Luke Meyers, Mountain Operator

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
