### Looking Back Fall 2019 ...

+ 05

Building "The Claw" at the Loveland Living Planet Aquarium in Draper, Utah. The final lift involved 8 cranes working in tandem.

Lego Crane

# Tight Quarters!

Mountain recently performed a turnaround project that involved our LR1600 crawler and LTM1750 all terrain cranes. The highlight of the event was removing a cold reheat exchanger and replacing it with a new one. We even got our SMPT Goldhofer trailer in the mix!

Fun fact: The original exchanger was set nearly 20 years ago. The lift was engineered by our own Adam Parker and he had the pleasure of drawing up the plan for the new one! Good work, Team Idaho!

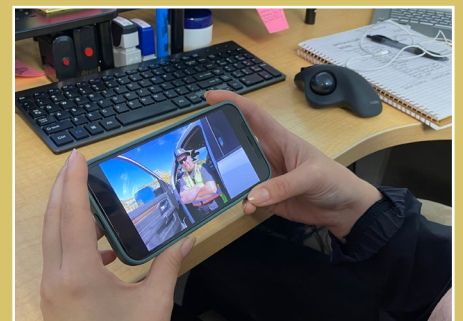

# 660 Ton Crawler - Heavy Lifting

## SAFETY STRONG EVERYDAY

From the office staff to the operator, every member of the Mountain Team receives a daily safety training either in person or digital format. Just another step to ensure that safety is at the forefront of our minds each day.

## Moving Blades Up the Mountain

If you take one look at this photo and wonder what is going on here, you aren't the first! This is a shot of our team hauling massive turbine blades up the mountain. With more and more demand for clean energy, finding the prime location to build a wind farm isn't always in an open, flat field. Unfortunately, moving massive 200'+ blades up a mountain is no small feat! Good thing our team is all about solutions! Mountain currently owns and operates the only set of FTV 550 blade lifters in North America. In March 2023, we will take delivery on the first and only set of FTV 850's in North America. Mountain has a Goldhofer fleet 200+ lines strong and an ever-growing crane fleet.

## Safety Strong, Safety Share

"Cell phones have evolved over the past few years and have become a vital form of communication in our daily lives. However, the concern that we face in our industry is that they can become a dangerous distraction. If the phone is needed for the task at hand, make sure it is a hands-free device. Otherwise, put the phone away and give your full attention to being safe for yourself and everyone around you."

Bryce Olsen, Field Safety Manager

# M MOUNTAIN

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
